DR. MARISA CONTINI
PHARMACIST

The passion for Natural Products allowed me to found Gricar, and to this day, with the cooperation of my colleagues, I am still enthusiastically following this path of continuous research for wellness and quality of life.

GRICAR'S PRESIDENT

RESPECT FOR THE CONSUMER, NATURE AND ENVIRONMENT

- Since 1970, Gricar has been directly formulating, realizing and distributing in Italy and abroad its products, which originate from its own research, a cutting-edge technology and a philosophy that has always been putting the natural well-being first (BE NATURAL), as a form of prevention and care.
- According to this attitude towards nature, Gricar developed with efficacy, safety and innovation, the concept of integrated herbal medicine, where the principles of phytotherapy and dietary supplementation merge, to give birth to products, especially designed to fulfill the health needs of each individual.
- Furthermore, this is also the reason why Gricar has grown a particular focus on children, developing a line specifically for them, by paying particular attention to dosage, taste and original source of raw materials.

Gricar a story begun in **1970**

An Italian reality developed over time
just as the **5 petals** of a flower.

Starting from this concept, recently, in 2015, the necessity arose
to revise its **brand** and gradually renew its **packaging**.
