

Propolis Baby

A LINE OF NATURAL REMEDIES, USEFUL FOR FALL, WINTER, SPRING, SUMMER

LINEA PROPOLIS BIMBI is a complete line containing Propolis, obtained using the MAEF™ method, and developed according to your kids' safety and necessities. Consequently, all products are easy -to -use, have a pleasant flavor and contain effective, safe and standardized vegetal extracts.

Oral spray:

For a targeted action

Propoli spray bimbi is a food complement with Black currant* and Propolis, produced by the MAEF™ method, a process of high efficiency maceration, to manufacture a concentrated, purified and dewaxed Propolis. Black currant is a natural help for mouth and throat. Its good taste of strawberry and cherry, makes the product particularly appreciated by children.

How to use:

1-2 sprays 3 times a day, when necessary.
Apply directly in the mouth and repeat throughout the day.

Pack:

15 ml

NUTRITIONAL VALUES

NUTRIENTI	per 60 gocce
Propolis extract	0,010 ml
Ribes d.e.	2,664 mg

Syrup:

It supports natural defenses and fluidifies bronchial secretions.

Propoli sciroposa bimbi is a food supplement with Propolis and extracts of Licorice(1), Coneflower and Marsh mallow, combined with a high percentage of honey. Propolis is produced by MAEF™ method, a process of high efficiency maceration, for producing a concentrated, purified and dewaxed Propolis, maintaining unaltered its properties. Licorice supports the wellness of nose and throat, and the fluidity of bronchial secretions. Coneflower supports the body's natural defenses, while Marsh mallow promotes the functions of the respiratory mucosa.

How to use:

Half a measuring cup twice a day or 3-4 tea spoons a day, to be taken pure or diluted in beverages.

Pack:

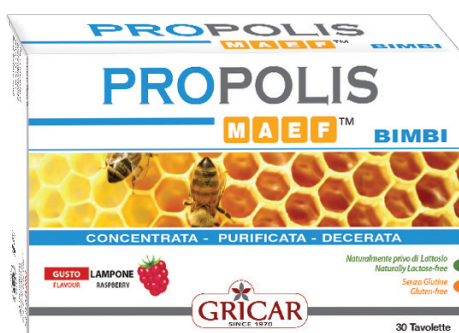

200 ml

NUTRITIONAL VALUES

NUTRIENTS	per dose
Propolis extract	0,33 ml
Echinacea f.e.	0,1 ml
