TO PROMOTE THE FUNCTIONALITY OF THE URINARY TRACT

is a food supplement of genotyped Probiotics, Vitamin B6, Blackberry, Selenium and Inulin as prebiotic. Probiotics and Prebiotics are useful for supporting the intestinal flora balance. Vitamin B6, together with Selenium, contributes to the normal function of the immune system. Bilberry favors the drainage of body fluids and the functionality of the urinary tract.

Functional ingredients:

Probiotics, Inulin , Blackberry, Vitamin B6 and Selenium
