

Quick tonic

1. Practicality: thanks to the small size, they allow for easy transport and quick intake of the product outside the home, without resorting to the use of a glass. In addition to the easy opening, it also guarantees rapid emptying at the time of intake, avoiding product waste.

2. Freshness and stability: they keep all the organoleptic characteristics and benefits of the contained product intact, protecting it from light and oxygen.

3. Dosage standardization: guarantee the intake of uniform doses

is a food supplement based on Eleuthero, Ginseng, Maca and Oak extracts, with Kiwi juice, amino acids, minerals and vitamins. The Kiwi has a supportive and reconstitute action. Eleutherococcus, Ginseng and Maca have a tonic and adaptogen function. Vitamins and minerals contribute to the reduction of tiredness and fatigue. Furthermore, Vitamin B6, B12 and Magnesium contribute to the normal functioning of the nervous system, and together with Folate to normal psychological function. Iron contributes to normal cognitive function, while pantothenic acid (vitamin B5) contributes to normal mental performance. Magnesium contributes to normal muscle function.
